Professional Objective

Full-Stack Software Engineer with hands-on experience in MERN stack development, focused on building scalable, high-performance web applications using clean and maintainable architecture. Proficient in RESTful API design, database optimization, and responsive UI development with real-time functionality. Actively expanding expertise in cloud computing and DevOps practices, with strong problem-solving skills demonstrated by solving 150+ data structures and algorithm challenges.

Projects

Attendance Management System : MERN, Multer, Helmet, Node-cron, Middleware *Nov 2025 – Jan 2026*

- Implemented **JWT-based authentication** with **role-based access control** (Employee: unlimited, Admin: 4, Super Admin: 1), protected routes, CORS configuration, and least-privilege security.
- Designed **MongoDB schemas** for users and attendance, supporting GPS tracking, selfie uploads, rectification workflows, and detailed audit logs.
- Built **end-to-end attendance workflows** including selfie verification, GPS map validation, approve/reject actions, remarks, and admin-controlled rectification limits.
- Developed **analytics dashboards** using Chart.js for daily trends, employee-wise statistics, attendance distribution, and average working hours.
- Delivered **admin reporting features** with Excel exports, role-based filters, secure file uploads, responsive UI using Tailwind CSS, and optimized frontend state management. [GitHub Repository](#)

Quick Chat App : React.js, WebSocket.io, JWT, Node.js, Cloudinary, MongoDB *jun 2025 – Jul 2025*

- Created a **real-time chat system** using WebSocket.io, enabling instant bidirectional communication with support for 900+ concurrent connections.
- Executed **secure JWT authentication** with login, signup, protected routes, token validation, and session handling.
- Constructed real-time features including **online status**, typing indicators, read receipts, instant message updates, and notifications.
- Integrated **Cloudinary media uploads** for image storage and optimization, with MongoDB managing user profiles and media metadata. [GitHub Repository](#)

Certificates

- Backend Development Course – [Physics Wallah](#)
- SQL (Structured Query Language) – [Great Learning](#)
- HTML, CSS, JavaScript the Hard Way (Projects) – [Udemy](#)
- CompTIA Linux+ XK0-005 – [Cybrary](#)
- DSA Self-Paced (C++ / Java) – [GeeksforGeeks](#)

Technical Skills

Languages: C++, JavaScript, TypeScript, Java

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js, Redux, REST APIs, SQL

Tools: Git, GitHub, MongoDB, Postman, Linux, Docker, Vercel, Cloudinary, CI/CD

Core Concepts: OOP, DBMS, Computer Networks, Operating Systems, AWS

Problem Solving: Solved 130+ DSA problems

Education

Lovely Professional University, Punjab

B.Tech in Computer Science Engineering

2021 – 2025

CGPA: 6.7

Hetauda School of Management

11th-12th Class

2019 – 2021

CGPA: 6.8

Shree Adhunik Rastriya Secondary School

10th Class

2017 – 2018

CGPA: 8.1
